GIRLS IN ACTION

Often, we spend excessive amounts of time focusing on the things we do not do well that we lose sight of the basic fact that we are usually all right just as we are. Girls in Action's balanced environment is designed to teach individuals to be strong and confident by making healthy choices throughout life. Instead of depending on others for approval we will focus on self worth and the things we value. Girls in action is recommended for girls in the 8-11 age group.
