

## **LOAD SECUREMENT**

The objective of this approximately three- hour course is to offer load securement training to drivers involved in hauling material meeting the regulation of CFR 49. The course also includes practical classroom exercises for drivers to practice securing loads on trailers.

This session will examine various load securement devices and demonstrate how to determine the number of devices and the varying methods of securement necessary for a given load.

The course content may be tailored to the needs of the audience depending on the primary operations of the host carrier.

This course is recommended for all drivers, dispatchers, safety personnel, insurance carriers **and management** responsible for trucks and drivers. The fee for this course is \$25 per driver with a minimum class size of 30 drivers. Please call for out-of-state training prices.
