

TRUCK TECHNOLOGY

(New 2010)

This approximately six-hour course explains the sophisticated new world of truck technology. Many drivers are not aware of the innovative changes that are offered in today's trucks. This course has an emphasis on brakes: their operation and adjustment. Even automatic slack adjusters must be manually inspected. In this class there will be a hands-on adjusting module.

Topics include:

- Brake System Operation & Adjustment
- ABS
- Airbags
- Traction & Stability Control

This course is recommended for drivers, dispatchers, safety personnel, insurance carriers **and management** responsible for trucks and drivers. The cost is \$60 per attendee with a minimum class size of 30 people. Please call for out-of-state training prices.
