

The IACUC is requesting that investigators submit a report at the conclusion of their protocol. The IACUC is interested in the success of the experiment, not the actual data. Use additional paper if more space is needed for responses.

Principal Investigator:

Title of Protocol:

Start Date:

Completion Date:

Today's Date:

1. Were there any variations or did you follow protocol as written/approved?
2. Were there any injuries related to your protocol (animal/student/investigator)?
3. How many animals were used for your protocol?
4. Were there any emergencies during the project that caused unexpected specimen trauma? (equipment failure, power outages, etc.)
5. Did organisms respond as expected (as described) in the basic testing protocol?
6. Were there any specimens unused during the testing procedure, and if so, have they been properly disposed of?
