

Theory, Composition, and New Media

Achieve Your Potential.

www.stcloudstate.edu/music

The Music Department at St. Cloud State University is proud to offer a variety of course offerings in theory, composition, counterpoint, and orchestration. It is particularly excited to present courses in electroacoustic music and new media. Students completing a degree in music theory and composition will be prepared to pursue graduate studies or a career in music creation.

The Department of Music hosts numerous guest artists and master classes with world-class musicians and composers. Under the mentorship of award-winning faculty, students have opportunities to hear their compositions performed, from large ensemble works to solo works to multimedia performance.

Our newest initiative is the establishment of advanced multimedia computer facilities, located in the Performing Arts Center and in Kiehle Visual Arts Center. These labs feature a variety of software programs, including Pro Tools, Max/MSP/Jitter, Kyma, Reaktor, Peak and numerous visual art software programs. The ElectroAcoustic and New Media Studio features a two channel editing station and a 5.1 surround sound system for multi-channel audio diffusion.
