

Frigidaire open house features new classroom

Interested faculty and staff are invited to an open house of the new SCSU laboratory facility located at Frigidaire Company in St. Cloud, from 2-4 p.m., Thursday, Feb. 22. (The open house scheduled for January 18 was cancelled do to bad weather.)

The laboratory facility is the most visible part of a cooperative agreement between SCSU, Frigidaire Company, St. Cloud Technical College and the Minnesota Job Skills Partnership. The purpose of the new facility is to provide a laboratory for hands-on experience with robotics/automation equipment and to deliver specific training to both students and Frigidaire employees.

This is a unique opportunity to see the beginning of a cooperative effort to provide applied education in an industrial setting for the advancement of student learning and worker training. The location is 540 33rd Ave. N. St. Cloud in the Frigidaire Company Employee Center. The open house will include guest speakers, robot demos and refreshments.
