

Faculty Technology Institute

Greetings, Colleagues:

CETL, in partnership with Info media Services, invites you to join us for the first Faculty, Learning, and Technology Summer Institute. We established the dates and designed the following schedule in response to the "needs and interests" indicated by faculty during TECH DAY 09 and through the survey monkey we sent out last week. The days, hours, session contents, and rooms are below, and we have them arranged in a table version in the attached Word document. We realize that this window of time and schedule will not meet the needs of all those who might be interested in the institute. We, therefore, rely upon you to let us know of your interest and your needs so we can continue planning into the future to meet them.

Since this is the first time we have tried this, we are not sure what the actual turnout will be. So, we are not requiring reservations; we will proceed on a first-come-first-serve basis for the first 30 to show up per room. You will note that some sessions run concurrently, so you will have to choose. Given the uncertainty of attendance, we will not be providing lunch, but we will have refreshments available in the morning and afternoon of each day.

Daniel Wildeson, Ph.D.

Director, Center for Excellence in Teaching and Learning Professor, Communication Studies Office
