Wondering if you can work multiple positions at the same time? Find the two positions you are considering on the chart (one on a row, one on a column)—the cell where they meet will tell you whether or not it is possible to be in both positions simultaneously. If it says yes, you can do both! If it says no, those positions are not compatible together (but you are still welcome to apply for both). Some positions are possible with enough advance planning, and those notes are listed as well.
