GenCyber Student Camp

Welcome to the GenCyber program. The National Security Agency (NSA) is host to one of the most inclusive and formidable cyber security training programs in the world. It’s a program designed to not only train the future cybersecurity force, but to improve the skills of high school teachers. The program provides cyber security awareness and education to students’ K-12, cyber security teaching methodologies for computer science teachers, and established resources for both cyber security teaching and learning curricula.

The GenCyber Student Camp at St. Cloud State University is free and will be held July 13-17, the Camp is for Middle and High School Students who are interested in learning about computer security, network security concepts and digital forensics. All participating students will receive a Google Chromebook, to use at the camp and is theirs to keep! The goal of the camp is to provide insights into various areas of cybersecurity topics, and promote students to seek further education into cybersecurity fields.

Camp Schedule:

Day 1: Computer Security & Computer Forensics  
Day 2: Digital Forensics & Related Disciplines  
Day 3: Cybercrimes & Securing Digital Assets  
Day 4: Steganography & Email Investigations  
Day 5: Open Source Forensics Tools & Lab Assignments

A limited number of openings are available for the Camp, (Deadline for Applications is June 15th, 2015) if you are a high school teacher, and are interested in attending the Camp or would like to find out more details, please contact:

Dr. Mark Schmidt, Professor of Information Systems,  
(320) 308-4988 (office), (320) 308-2174 (department), email: mbschmidt@stcloudstate.edu or;

Dr. Tirthankar Ghosh, Professor of Information Technology Security,  
(320) 308-2213 (office), (320) 308-6084 (department), email: tghosh@stcloudstate.edu
