

COVID-19

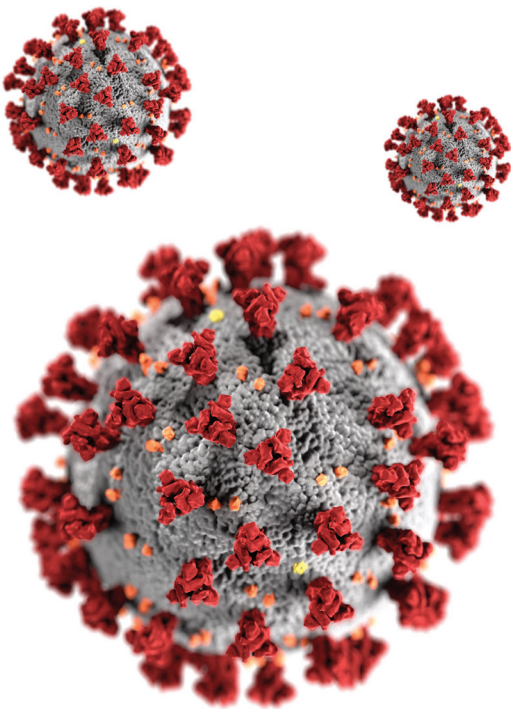

And the Social Determinants of Health*

* This refers to the different social, economic, cultural, environmental, political, religious, and biological factors associated with health and disease.

What does this mean to our communities and to higher education?

Dr. Giovanni Antunez

- Professor of epidemiology and community health, St. Cloud State University

Thursday, December 3, 2020
2:00pm-3:00pm
