Abby Smith, a Gerontology graduate student, presented a poster during the Gerontological Society of America’s 59th Annual Scientific Meeting this November 16-20, 2006, in Dallas, TX. Rona Karasik, the professor of GERO 630, led students **Abby Smith, Sarah Jones, Michelle Kuhlmann, Wendy Forbregd, and Suzanne Snyder** through the project. *Developing a Dementia Training Manual: Outcomes of Intergenerational Service-Learning Project* Intergenerational service-learning has been shown to promote civic engagement in students, while providing needed service to the community. In the current project, gerontology graduate students in a course on “Aging and Community” were approached by a local care facility for assistance in creating accessible staff training in dementia. The training materials were to be directed toward staff in newly opened Memory Loss Cottages which were designed to provide dementia care for residents in the early to moderate stages of dementia. The staff were Certified Nursing Assistants but had received no formal dementia training. After touring the facility, the class researched and created a dementia training manual that began with an overview of dementia in later life. Communication, challenging behaviors, catastrophic reactions, sundowning, environmental modifications, and dealing with day to day caregiving were all covered in detail. The manual also included a pre-test and post-test for staff to assess their own learning. In addition, the class developed a dementia-appropriate box of activity ideas for staff and visitors tailored to the needs of the current residents. At the end of the semester, the class shared their material with the agency and taught in-services to the staff. Outcomes of this service-learning project, including the staff training materials, students’ reflection on their learning experience, and agency satisfaction with the service provided will be presented.
