

Export Controls Checklist

It is important for SCSU and its researchers to be familiar and comply with the export control laws and regulations which govern research funding. The U.S. Government's export controls are designed to protect national security and promote the foreign policy objectives of the U.S. and its allies. Identifying sponsored projects and externally funded proposals subject to export controls early in the process aids in efficient and effective negotiations.

Please use this tool to determine if compliance with export control regulations applies to your proposal.

Name: _____ Date: _____

Does this proposal, project, contract, or agreement:	YES	NO
1. Involve transfers of material, equipment or technology of "dual-use" (commercial or military) with a civilian application listed on the CCL?		
2. Involve transfers of material, equipment or technology of inherently military use listed on the U.S. Munitions List?		
3. Involve transactions of encryption software?		
4. Contain restrictions on publications?		
5. Contain restrictions on researcher participation based on country of origin?		
6. Involve "side deals" between PI's and sponsors?		
7. Involve foreign nationals in the United States?		
8. Involve foreign colleagues in foreign countries?		
9. Involve transactions with sanctioned countries?		
10. Involve transactions with parties on the Entity and Denied Persons List?		

If the answer to any of these questions is "YES", or if you have other questions related to export controls, please contact:
