

Anoka-Ramsey Community College (ARCC) to SCSU

Bachelor of Science – Radiologic Technology Transfer Guide

Transfer Process

All transfer students seeking a Bachelor of Science degree in Radiologic Technology should follow the admission procedures located on the following website in order to be admitted to St. Cloud State University: www.stcloudstate.edu/transfer.

The following Radiologic Technology major courses transfer from ARCC to SCSU

Anoka-Ramsey Community College Course		SCSU Course
BIOL 2113 - Human Anat & Phys I	→	BIOL 202 - Human Anatomy and Physiology I
BIOL 2114 - Human Anat & Phys II	→	BIOL 204 - Human Anatomy and Physiology II
No equivalent offered at ARCC - do not take at ARCC	→	BIOL 266 - Medical Terminology
MATH 1200 - College Algebra I	→	MATH 112 - College Algebra
PHYS 1317 - General Physics I	→	PHYS 231 - General Physics I
PHYS 1318 - General Physics II	→	PHYS 232 - General Physics II
CHEM 1061 - Principles of Chemistry I	→	CHEM 210 - General Chemistry I

Important Background

Many students are more familiar with two-year radiologic technology programs which allow students to combine “admission to the college” with “admission to the program” and therefore allow applications to a radiologic technology program before transferring. However, at SCSU, admission to the university is separate from admission to the radiologic technology program. At SCSU, a student can only apply to the radiologic technology program after they have completed at least one semester at SCSU (perhaps more than one semester, depending on what courses they took, etc.).

So, if you are interested in transferring to SCSU to be a part of our Radiologic Technology program, here are the initial steps that you should follow: (a) apply to the university through the admissions office; (b) be accepted by the university; (c) specify your intended major as “pre-Radiologic Technology”; and (d) sign up for a transfer advising day. Except for job shadowing (see below), these are the only steps that you can accomplish as a non-SCSU student. Once you actually come to SCSU and start taking classes at SCSU, you can move forward in the process of majoring in Radiologic Technology.

Job Shadowing

All students are required do 21 hours of job shadowing (as a college student) in x-ray imaging. The appropriate form to record your hours is available at <http://www.stcloudstate.edu/healthsciences/radtech/faq.asp>. Since you are already a college student at another institution, you should do this job shadowing as soon as possible (do not wait until you get to SCSU).

Notes

- Please visit the Radiologic Technology website for additional information (<http://www.stcloudstate.edu/healthsciences/radTech/>).

- Admission to SCSU does not guarantee admission to the Radiologic Technology major or the required clinical internship.
- All students need at least 30 credits completed at SCSU as a graduation requirement. If you will only be on campus one year, you will need 30 SCSU credits on campus (students normally take 15 credits in the fall semester and 15 credits in the spring semester). Students should plan to take at least 12 credits in their first semester at SCSU.
- Because of the required coursework in mathematics and science, students graduating with a major in Radiologic Technology are considered as having satisfied the liberal education program requirements in Goal areas 3 and 4. Additional courses in Goal 3 and Goal 4 are not needed.
- If a student completes a goal area within the MnTC, the same goal area will be completed at St. Cloud State University once transferred.
