

Saint Paul College to St. Cloud State University Radiologic Technology

Transfer Process

All transfer students seeking a Bachelor of Science degree in Radiologic Technology should follow the admission procedures located on the following website in order to be admitted to St. Cloud State University: www.stcloudstate.edu/transfer.

The following courses from Saint Paul College transfer to B.S. in Radiologic Technology at SCSU:

Saint Paul College Course		SCSU Course
BIOL 1730 – Human Body Systems	→	BIOL 103* - Human Biology
BIOL 2721 – Human Anat/Phys I	→	BIOL 202 - Human Anatomy and Physiology I
BIOL 2722 – Human Anat/Phys II	→	BIOL 204 - Human Anatomy and Physiology II
BIOL 1471 – Medical Terminology	→	BIOL 266 - Medical Terminology
MATH 1730 – College Algebra	→	MATH 112 - College Algebra
PHYS 1720 – Principles of Physics OR PHYS 2700 - General Physics 1 (with calculus)	→	PHYS 231 - General Physics I PHYS 234 (will fulfill PHYS 231 requirement)
PHYS 1722 – Principles of Physics 2 OR PHYS 2710 – General Physics 2 (with calculus)	→	PHYS 232 - General Physics II PHYS 235 (will fulfill PHYS 232 requirement)
CHEM 1711 – Chemistry I	→	CHEM 210 - General Chemistry 1

* BIOL 103 is needed and should be taken at Saint Paul College if student does not complete the equivalent to Anatomy and Physiology (BIOL 2111 and BIOL 2112) at Saint Paul College. If student does take Anatomy and Physiology at Saint Paul College, they do not need to take BIOL 103.

Important Background

Many students are more familiar with two-year radiologic technology programs which allow students to combine “admission to the college” with “admission to the program” and therefore allow applications to a radiologic technology program before transferring. However, at SCSU, admission to the university is separate from admission to the radiologic technology program. At SCSU, a student can only apply to the radiologic technology program after they have completed: at least one semester at SCSU (perhaps more than one semester, depending on what courses they took, etc.).

If you are interested in transferring to SCSU to be a part of our Radiologic Technology program, here are the initial steps that you should follow: (a) apply to the university through the admissions office; (b) be accepted by the university; (c) specify your intended major as “Radiologic Technology”; and (d) sign up for a transfer advising day. Except for job shadowing (see below), these are the only steps that you can accomplish before beginning coursework at SCSU. Once you come to SCSU and begin taking classes on campus, you can move forward in the process of majoring in Radiologic Technology.

Job Shadowing

All students are required do 21 hours of job shadowing (as a college student) in x-ray imaging. The appropriate form to record your hours is available at <http://www.stcloudstate.edu/healthsciences/radtech/faq.asp>

Since you are already a college student at another institution, you should do this job shadowing as soon as possible (do not wait until you get to SCSU).

Notes

- Please visit the Radiologic Technology FAQ's website for additional major information (<http://www.stcloudstate.edu/healthsciences/radTech/faq.asp>).
- If a student completes a goal area within the MnTC, the same goal area will be completed at St. Cloud State University once transferred.
- 45 upper-division credits (300-400 level coursework) are equired to graduate from SCSU.
- Admission to St. Cloud State University does not guarantee admission to the Radiologic Technology major or the required clinical program.
- Because of the required coursework in mathematics and science, students graduating with a major in Radiologic Technology are considered as having satisfied the liberal education requirement in mathematics and natural/physical science.
