What features of Navigate do you use most frequently?
I most frequently use the appointment campaigns feature.

How has Navigate made a difference in your work?
Navigate has made it much simpler to schedule appointments with my advisees, and to keep track of who has met with me and who has not. Navigate has also been helpful in the past for issuing academic alerts for students who stop coming to class and do not respond to emails, which I think helps prevent some of them from falling through the cracks.
